Md Nafim Alam

Information Systems & Analytics | Business Analytics | Data & Technology

mdnafimalam@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Management Information Systems student at Emporia State University with hands-on experience building analytics applications using SQL, Python, SQLite, Pandas, Streamlit, and GitHub Actions. Combines technical project work with front-of-house leadership experience in team coordination, customer service, operations, and day-to-day problem solving.

TECHNICAL SKILLS

Data & Analytics: SQL, SQLite, Pandas, KPI analysis, aggregations, trend analysis

Development: Python, Streamlit, modular application structure, GitHub

Databases: Relational design, normalization, joins, subqueries, views

Testing & Quality: Unit tests, integration tests, data validation, GitHub Actions

Information Systems: Business processes, systems thinking, operational analysis

Security Foundations: HTTPS/TLS, session security, CSRF, firewalls, Linux permissions

SELECTED PROJECTS

Retail Intelligence - SQL Business Analytics Dashboard

SQL | Python | SQLite | Pandas | Streamlit | GitHub Actions

- Built a live retail analytics application covering revenue, customer behavior, product performance, regional trends, KPI reporting, and data-quality checks.
- Used a normalized SQLite model, SQL reporting, a Pandas analytics layer, automated tests, GitHub Actions, and CSV export to support repeatable analysis.

SignalScope - Pattern Intelligence

Python | Streamlit | Plotly | Validation | Explainable Analytics

- Developed a privacy-aware analytics application for repeated communication activity using pseudonymized metadata, temporal analysis, and explainable source-level scoring.
- Implemented global filters, weekday-by-hour heatmaps, source drilldowns, data-quality review, CSV export, and automated test coverage with CI.

EXPERIENCE

Front-of-House Lead / Supervisor | Fresh Ideas Management, Emporia State University | June 2024 - Present

- Support front-of-house operations, team coordination, customer service, and day-to-day operational problem solving in a university environment.
- Build practical leadership, communication, and service-management experience while supporting consistent daily execution.

Management Intern | Fresh Ideas Management, Emporia State University | August 2025 - December 2025

- Gained practical exposure to management, service operations, team coordination, and day-to-day business execution.

EDUCATION

Emporia State University | BSB - Information Systems & Analytics | Expected December 2027

Relevant study: Database systems, information systems, cybersecurity, finance, and quantitative problem solving.
